Search Query

<https://swapi.dev/api/starships/?search=falcon>

<https://swapi.dev/api/starships/?search=falcon>

Part 2:

1. The POST requests expects a body
2. The GET request returns a JSON
3. DELETE <https://practiceapi.devmountain.com/api/posts?id=555>
4. Possible response codes: 200, 409
5. <https://practiceapi.devmountain.com/api/posts?id=6934>
6. PUT <https://practiceapi.devmountain.com/api/posts?id=6934>
7. GET blue posts <https://practiceapi.devmountain.com/api/posts/filter?text=blue>
8. Content Type / Charset : Charset=utf-8, all possible characters
9. Put return 409: Request was missing req.query.id or req.body.text
10. The get request is not built to receive any queries, there are no parameters; everything gets returned because nothing is filtered out
